QPTS QUEEN'S PARK TELECOMMUNICATIONS SYSTEM

In December, 1990, the Queen's Park Telecommunications System (QPTS) was introduced to provincial government offices in Metro Toronto. A fully-digital telephone exchange, will be completed this year to serve 18,000 government staff. With QPTS, almost all users will have direct-in-dial where individuals have their own separate line and number. This will reduce delays inherent in shared lines and improve the Ontario government's ability to serve the public.

TELECOMMUNICATIONS SERVICES

A complete range of telecommunication services are available to all government users. Services encompass telephone (local and inter-city), fixed and mobile radio communication systems, radio paging systems, data communication systems, voice processing systems, facsimile, video, satellite and various other special telecommunication systems.

Both operational and advisory services are provided. Operational services include telecommunication systems design, systems/service acquisition, systems implementation, and the provision and management of common telecommunication services (Centrex services, Inter-City Network). Advisory services include system feasibility studies, systems planning, hardware and software evaluation, project management and coordination and both the preparation of request for proposals and evaluation of supplier proposals. To obtain information or assistance regarding these services, call your MGS Customer Support Coordinator. The name and number is located under the Computer and Telecommunications Services Division listings within the Ministry of Government Services section.

AUDIO TELECONFERENCING (CONFERENCE CALL)

Audio teleconferencing allows users from different locations to meet electronically, using their telephones.

After confirming all participants' names, respective locations and phone numbers, the meeting coordinator should call the Queen's Park teleconferencing operator at 325-3400 to arrange the service. (In addition, please inform the operator if any group device such as speakerphone or conference 2000 will be used, and if any of the participants will be calling late).

VOICE MAIL

Voice mail is a powerful communications enhancement to the standard telephone service provided to Ontario government employees. Its primary function is to facilitate communications within the Ontario Public Service by enabling voice mail subscribers to send and receive messages between each other without the need for all parties to be available on the phone at the same time. This is particularly important in situations where employees are involved in meetings or other work activities that take them away from their office or work station. As an added benefit, especially on occasions when an employee is unavailable to personally answer a call from the general public or from another Ontario public servant not equipped with voice mail, it provides the option for the caller to leave a private audio message in the called party's mailbox, or speak directly to an employee if the call is of urgent nature.

For further information contact your ministry's telephone service coordinator or Computer and Telecommunication Services Customer Support representative.

TELEPHONE DIRECTORY COORDINATORS

ONTARIO COMMUNICATIONS NETWORK

The Ontario Communications Network (OCN) is an enhanced telephone network using computer-based network management facilities. The Ministry of Government Services' Computer and Telecommunication Services (CTS) branch is continuing to upgrade the network across the province.

Once you are connected to the new network, it will no longer be necessary to use the Inter-City Network (ICN) codes. The dialing procedure will connect you to the appropriate line for any location served by the network.

All Centrex I users now on 965, 963 and 324 exchanges are now being converted to the new Queen's Park Telecommunications System (QPTS) and will be able to access the OCN using the 8 + 1 dialing procedure.

Training programs are carried out for employees in all locations before their telephones are connected to the improved network. Until your telephone system has been converted, continue using the ICN codes.

For more information about the network, call your MGS Customer Support Coordinator. **If you experience any problems with the OCN, call the CTS Service Desk at 327-3900.**

INTER-CITY NETWORK

If your telephone system is enhanced, refer to the above section. For those locations without enhanced network services, access to the Inter-City Network (ICN) *remains as before*.

The ICN allows a caller to dial direct from government offices in Toronto and government centres in Guelph, Hamilton, Kingston, Oshawa, Ottawa, North Bay, Sudbury and Sault St. Marie, to hundreds of other Ontario localities without incurring a long distance charge. The ICN should only be used by the staff of Ontario government ministries and approved agencies, and members of the Provincial Parliament, to conduct government business.

If you are calling from Toronto exchanges 965, 963, 324, you can use the ICN to call anywhere outside the Metro Toronto free calling area.

Pages xvi through xxii list Ontario cities and towns with their area codes and ICN access numbers.

To access the ICN, dial the number listed in the Inter-City column for the locality you want to reach. Then dial the seven-digit local telephone number.

If there is no Inter-City number for that particular locality, place your call through regular long distance means. For this purpose, area codes are listed. For area codes of localities not listed, consult your Bell directory or call the Bell long distance operator.

For information regarding access codes on the Inter-City Network, or to report troubles, call the Queen's Park operator at 325-1093.

INTER-CITY NETWORK LOCATIONS AND DIALING CODES

The following pages contain alphabetical listings of Ontario cities and towns, along with their applicable inter-city code numbers and area codes.

Please note that inter-city network dialing codes are accessed only from 963, 965 and 324 exchanges. Users on other exchanges should refer to instructions on introductory page v.

COMMERCIAL STANDARDS PROGRAM
555 Yonge Street
Toronto Ontario M7A 2H6

The components of this program promote a high level of ethical business conduct by ensuring public disclosure of the essential elements of business transactions and the registration and licensing of persons dealing with the public. The various branches also conduct inspections of the financial operations of the regulated industries. In addition, the program provides services for incorporation of companies and the administration of The Motor Vehicle Accident Claims Fund which handles claims and payments for damage done by stolen, unidentified or uninsured motor vehicles.

The Commercial Registration Appeal Tribunal is the mechanism that allows licensees and registrants to appeal decisions and proposals made by Registrars of regulated industries, and also appeals from decisions made under the CEMETERIES ACT and the FUNERAL DIRECTORS and ESTABLISHMENTS ACT. Appeals of decisions regarding compensation fund claims under the ONTARIO NEW HOME WARRANTIES PLAN ACT and the TRAVEL INDUSTRY ACT and Motor Vehicle Dealers' Compensation Fund are also heard.

HOUSING OPERATIONS DIVISION
10th Floor 777 Bay Street
Toronto Ontario M5G 2E5

The Housing Operations Division is responsible for the delivery of all social housing, housing supply and rent review programs.

Social housing programs refer to those activities which provide socially assisted housing to residents in need. Ministry staff work with non-profit and cooperative housing organizations, the private sector, other ministries, and other levels of government in the development of private and municipal non-profit and cooperative housing. Division staff also provide technical and tenant support services to the Ontario Housing Corporation, landlord of Ontario's public housing stock.

Housing supply programs are those initiatives, such as Home Sharing and Convert-to-Rent, which encourage and facilitate the supply of affordable and adequate rental and ownership housing in Ontario.

Rent Control Programs administer both the RENT CONTROL ACT, which regulatesrent increases in private residential rental housing, and the RENTAL HOUSING PROTECTION ACT, which controls conversions and demolition of, and renovations and repairs to, rental accommodation. Information is also available through this division regarding the LANDLORD AND TENANT ACT, which governs other landlord/ tenant matters such as eviction, privacy and maintenance responsibilities.

LABOUR-MANAGEMENT SERVICES

The role of Labour-Management Services is to further harmonious relations between employers and employees.

The program is provided through the Office of the Deputy Minister, the Office of Mediation, the Office of Arbitration, and the Office of Collective Bargaining Information.

The Office of Mediation endeavors to assist in the settlement of Collective Agreements through conciliation and mediation officers. Preventive Mediation Programs are also provided to facilitate improvement in the day-to-day relationship between the parties during the term of the Collective Agreement.

The Office of Collective Bargaining Information offers research and information services to unions, management and government in the area of labour relations and collective bargaining, including the preparation of regular reports on negotiated changes in wages and benefit provisions.

The Office of Arbitration assists the Minister to carry out the statutory responsibility of constituting boards of arbitration and appointing single arbitrators under THE LABOUR RELATIONS ACT and THE HOSPITAL LABOUR DISPUTES ARBITRATION ACT. It monitors the progress of arbitration proceedings and catalogues awards for public availability. Through its staff of Grievance Mediators, the Office of Arbitration provides labour and management with grievance mediation assistance. In addition, appeals against Orders issued under THE EMPLOYMENT STANDARDS ACT are coordinated in this office.

Thanks to the many of you who responded to our user questionnaire last fall. Changes were made as a result of your comments. Now that you have had some six months to test out the changes, we are asking you, as well as first-time users to send us your "report card" or completed questionnaire in order that we can continue to provide a useful, easy-to-use directory. After completing this questionnaire, please moisten glue strips, fold in half and return to the address printed on the reverse.

PROPERTY ASSESSMENT PROGRAM

This program administers the ASSESSMENT ACT, under which it is responsible for property assessment and municipal enumeration. It assesses property (land and buildings) in Ontario and determines a value for each property, which is then used by municipalities and school boards to calculate local taxes. It conducts a municipal enumeration every three years and creates municipal voters' lists and school support lists. Under the

PROVINCIAL LAND TAX ACT, it assesses property in unorganized territories, and under the COMMERCIAL CONCENTRATION TAX ACT, it is responsible for identifying commercial properties in the Greater Toronto Area that are liable for the tax.

ALPHABETICAL LISTINGS

Explanatory Notes

PAGE NUMBER

The number in brackets immediately following the employee's given name indicates the office listing page on which that employee's name appears. **When a page reference is not shown, the employee's ministry has requested their name should ONLY be printed within the alphabetical section.**

EMPLOYEE LOCATION

The city or town name is shown for each employee, to enable directory users to distinguish between local and long-distance telephone numbers. Before calling any location other than Toronto, refer to the bottom of the introductory Page v.

The full address of any employee can be readily determined either by referring back to the appropriate office listing page using the page number provided, or by telephoning the employee.

Ministry of Government Services

Ontario

We are pleased to portray Dr. Roberta Bondar, Canada's first woman astronaut, on our cover during International Space Year. Also featured is Roberta Bondar Place, the new Ontario government building in Sault Ste. Marie, named in her honour.

Dr. Bondar and her achievements represent the spirit of innovation and exploration that has always made people Ontario's greatest asset. In the late 1970's, Ontarians designed and built the Canadarm, showing that we were on the way to global competitiveness in high technology research and development.

Today, more than 50 companies across Ontario are working in space-related technology, including satellite construction, deep space research, remote sensing (the use of satellites for environmental and geographic research), specialized data development and marketing, and life science programs to enable people to live in space.

Ontario is currently developing the Algonquin Space Complex into a facility for deep space research and space education. This summer, for the first time, 300 Ontario high school students combined camping with space-science studies at the Algonquin Space Campus, allowing a new generation to explore opportunities and challenges in the field of space research.
